Target GA: August, 2018

CONFIDENTIAL

Feature at a Glance

Introducing: Access to SAP Ariba REST APIs is now extended to sites in UAE

Ease of implementation

Low touch / simple

Geographic relevance

Global

Customer challenge

Local regulations requires customers to use localized SAP Ariba solution and so the availability of SAP Ariba APIs via the Developer Portal is crucial.

Meet that challenge with SAP Ariba

This feature extends access to the SAP Ariba APIs and the SAP Ariba developer portal to sites hosted by UAE data center.

Experience key benefits

Extension of API access to UAE data center enables users and their organizations to:

1. Discover, learn and consume APIs through a central repository.
2. Manage developer onboarding, application registration and other administrative functions.
3. Access a rich set of developer resources such as API guides, an API Catalog and Sandbox, a mock business environment for rapid development, and prototyping
4. Easily and securely extend SAP Ariba solutions.
5. Reduce the cost and time needed to develop unique industry- and region-specific applications.

Solution area

SAP Ariba APIs
SAP Ariba developer portal

Implementation information

This feature is enabled for use by all customers registered to use the SAP Ariba developer portal.

Prerequisites and Limitations

Prerequisite:

The customer's realm is hosted at the UAE Data Center.
