# Enhanced Guided Buying Form Behavior

Description: This feature allows form creators to utilize guided buying specific fields and allows for greater flexibility when creating form logic based upon individual user information.

# Enhanced Guided Buying Form Behavior

## Current Problem

Today forms have the capability to support conditional statements that can control form behavior. This capability is limited to just the fields on the forms and their values.

## Solution

This feature will add the ability to create conditional statements on information about the user creating and editing the form

## Benefits

Buy-side

- More flexibility for the form to collect all of the necessary information that can be specific to a user and their role in the organization.

## Conditions for Advertising Channel

Conflicting conditions have been entered. For example, both SHOW and REQUIRE have been created in the same field. Please edit the conditions.
