In Ariba P2P solutions, a purchasing user can create a requisition for non-catalog items. The user usually enters an estimated price on these non-catalog item, as the final price may not have been negotiated with the vendor. This estimated price on non-catalog item, helps the buyer to ensure that the approval is received from the appropriate approvers for the expected value of goods and services.

The buyer organizations want a capability to hide or mask the 'estimated price' from the supplier on the order on the Ariba Network. In the absence of this capability, there have been instances wherein the vendor have actually charged a much higher price, from the buyer organization.

Feature description

Introduce 2 new parameters

- 'AllowMaskingOfPriceOfNonCatalogItemsFromSupplier' (Param1)
- 'AllowMaskingOfPriceOnCollaborationItemsFromSupplier' (Param2)

If any of these parameters are set to true it will result in displaying a checkbox 'Hide Price from Supplier' next to the price field of an Item on a PR and Collaboration Request respectively. By default these parameters are set to false.

A **new group**, 'Hide Price from Supplier' will be introduced. The users belonging to this new user group 'Hide Price from Supplier' as well as users with 'Purchasing Agent' and 'Edit Approvable' group permissions, will have the option to edit the checkbox to hide the price & amount from the supplier.

Hide Price for Non-Catalog Items

If parameter
 AllowMaskingOfPriceOfNo nCatalogItemsFromSuppli er is enabled, and the user belongs to the group Hide Price from Supplier, an option to hide price from supplier is available

Buyer Views Supplier Proposal

Current Problem

The purchasing user usually enters an estimated price on non-catalog items, as the final price may not have been negotiated with the vendor. This estimated price on non-catalog item, helps the buyer obtain approval from the appropriate approvers for the expected value of goods and services.

Solution

This feature introduce the capability for buyer to hide or mask the 'estimated price' from the supplier on the order on the Ariba Network. In addition, the feature is also extended to work on Collaboration Requests.

Benefits

With this feature, a buyer can estimate a price on a Requisition for budgetary and approval purposes, without exposing this as a commitment to the supplier.

Applicable to the Following:

- SAP Ariba Buying
- SAP Ariba Buying & Invoicing

Change Management for GA:

None

Using this Feature:

Enabling

- Contact Ariba to set Application.Purchasing.AllowMaskingOfPriceOfNonCatalogItemsFromSupplier parameter
- Contact Ariba to set Application.Purchasing.AllowMaskingOfPriceOnCollaborationItemsFromSupplier parameter
- Assign users who should have the ability to hide price to the group "Hide Price from Supplier"

Prerequisites

None

Limitations

- This is limited to non-catalog requisitions only
- This feature is not applicable to Copy Orders

Importing and Exporting Data

NA

Changes to Existing Functionality or User Interface

None
